0. Prerequisites

0.1 Legal environment

0.1.1 Responsibility for collecting, processing, and disseminating statistics

The Statistics Agency under the President of the Republic of Uzbekistan

On August 11, 2021, the Law of the Republic of Uzbekistan “On Official Statistics” was adopted, which was developed on the basis of the Generic Law on Official Statistics for Eastern Europe, Caucasus and Central Asia.

The purpose of the Law is to regulate relations in the field of official statistics. This Law applies to producers and users of official statistics, respondents and suppliers of administrative data, as well as relations arising between them related to the production, dissemination and coordination of official statistics.

Also, in accordance with the Regulations on the Statistics Agency under the President of the Republic of Uzbekistan, approved by the Resolution of the President of the Republic of Uzbekistan dated March 4, 2024 No. RP-114 “On measures to organize the activities of the Statistics Agency under the President of the Republic of Uzbekistan”, the Statistics Agency is responsible for compliance with the basic principles of official statistics and unity of statistical methodology consistent with international recommendations; organizing the collection of statistical data, statistical observations of households, conducting censuses, one-time counts, sample surveys and other statistical observations; providing users of all levels with official statistical data in the prescribed manner; maintaining statistical registers and classification systems for their use for statistical purposes.

At the same time, in accordance with Article 14 of the Law “On Official Statistics”, statistical authorities have the right:

- receive from state and economic management bodies, citizens' self-government bodies, banks and other organizations forms of statistical observation and use statistical observation data for statistical purposes;
- to carry out statistical observations of the activities of statistical units and use the obtained primary data for statistical purposes;
- to reward respondents - individuals for participating in statistical observations;
- to request and receive from state and economic management bodies, as well as from other organizations, information necessary for the implementation of statistical programs;
- involve on a contractual basis individuals and legal entities to collect statistical data necessary for the production of official statistics, in accordance with the law;
- use and introduce into the national statistical system modern methods and tools for collecting, processing, summarizing, analyzing, disseminating and storing statistical data;

- in case of revealing violations related to the presentation of statistical data, give instructions on their elimination and make appropriate corrections to the statistical data;

- within the limits of their powers, apply to officials who have violated the procedure for submitting statistical reports, measures of administrative penalties in accordance with the law.

According to Presidential Order №O-5054 dated September 12, 2017, economic and financial data in the country must comply with the requirements of the Enhanced General Data Dissemination System (e-GDDS) of the International Monetary Fund and be coordinated within the framework of this system.

Management of statistical processes, including the preparation and dissemination of statistical data, is carried out in accordance with national procedures developed on the basis of international quality management models (GSIM, GSBPM, GAMSO).

0.1.2 Data sharing and coordination among data producing agencies

The Statistics Agency under the President of the Republic of Uzbekistan

According to article 11 of the Law on Official Statistics, producers of official statistics are guided by internationally recommended definitions, classifications and methodology when producing statistics.

The authorized state body, within the framework of statistical programs, coordinates the activities of other producers of official statistics.

Producers of official statistics coordinate the methodology for producing statistics within their mandate.

If a discrepancy with international recommendations is revealed in the statistical methodologies of other producers of official statistics, the authorized state body, based on the results of the audit of statistical methodologies, has the right to make them mandatory submissions.

Other producers of official statistics that are part of the national statistical system create subdivisions responsible for generating statistical data and ensuring information exchange with the authorized state body.

Producers of official statistics and suppliers of administrative data submit to the authorized state body the statistical and (or) administrative data they have at their disposal free of charge in the manner and terms established by statistical programs.

According to Article 10 of the Law “On Official Statistics”, the Statistical Council is a collegial advisory body on the development, functioning and coordination of official statistics under the authorized state body.

The composition of the Statistical Council is formed from representatives of government bodies, research organizations, non-governmental non-profit organizations, as well as national experts in statistics.

0.1.3 Confidentiality of individual reporters' data

The Statistics Agency under the President of the Republic of Uzbekistan

According to Article 27 of the Law “On Official Statistics”, individual data held by the producers of official statistics are used exclusively for statistical purposes to compile aggregate statistical data. Individual data cannot be used by state bodies, citizens' self-government bodies and other organizations, including international ones, for the purposes of investigation, control, litigation, administrative decisions or for other purposes concerning individuals and legal entities or households.

The Statistics Agency's employees must comply with the code of ethics, including the principle of confidentiality, not disclose any information provided to them in the performance of their duties.

They are informed of the responsibilities at the time of appointment. Each employee of the Statistics Agency is obliged to sign an agreement that obliges him not to disclose such data.

0.1.4 Provision of statistical reporting

The Statistics Agency under the President of the Republic of Uzbekistan

According to Article 14 of the Law "On Official Statistics", state statistics bodies have the right to receive forms of statistical observation from bodies of state and economic management, self-government bodies of citizens, banks and other organizations. In accordance with Article 215 of the Code of the Republic of Uzbekistan "On Administrative Liability", violation by officials of the procedure for submitting statistical reports, expressed in failure to submit reports and other data necessary for conducting statistical observations, distortion of reporting data or violation of the deadlines for submitting reports entails the imposition of a fine from seven to ten basic calculated values.

According to Article 16 of the Law "On Official Statistics", when conducting statistical observations in accordance with statistical programs, respondents are obliged to provide producers of official statistics with reliable and complete data free of charge in the manner and terms established by the producer of official statistics.

0.2 Resources

0.2.1 Staff, facilities, computing resources, and financing

The generation of data on demography at the republican level is carried out by employees of the Division of Demographic Indicators of the Department of Demography, Labour and Gender Statistics of the Statistics Agency under the President of the Republic of Uzbekistan. At the regional level, this indicator is formed by employees of the divisions of demography, labour and gender statistics of the territorial statistics departments.

The Division of Demographic Indicators has 4 employees, and the divisions of demography, labour and gender statistics of territorial statistics departments have an average of 3 employees. The number of employees is sufficient to fulfil the assigned tasks of generating statistical data on population statistics.

All employees have the appropriate level of qualifications. The maintenance and development of skills in work is facilitated by regular training of employees in courses at the Institute for Professional Skills Upgrading and Statistical Research of the Statistics Agency.

Electronic computing resources are sufficient to complete the tasks assigned to the division, the software is periodically updated and corresponds to the assigned and emerging tasks. Each workplace is equipped with a personal computer connected to a local network. Sufficient protection of electronic computing resources is ensured, including through the provision of emergency support systems for the restoration of statistical information.

Material, technical and other resources correspond to the assigned tasks. The financial resources provided are sufficient to carry out the work provided for by the statistical program for demographic statistics.

1.Integrity

1.1 Professionalism

1.1.1 Impartiality of statistics

The Statistics Agency under the President of the Republic of Uzbekistan

According to Article 6 of the Law “On Official Statistics”, the main principles of official statistics are impartiality and objectivity.

According to Article 13 of the Law “On Official Statistics”, state bodies, other organizations and their officials are not entitled to interfere with the activities of state statistics bodies carried out in accordance with this Law.

Territorial departments of statistics, departments of statistics of districts (cities) are independent from local government bodies and are directly subordinate to the authorized government body.

In the production of this statistical information, government intervention is not allowed, and professional independence is fully ensured.

When selecting the employees and appointing them to senior positions, their experience and professionalism in the field of statistics are taken into account. Improvement of the qualification of the department’s employees is ensured through participation in training courses organized by the Institute for Professional Skills Upgrading and Statistical Research of the Statistics Agency under the President of the Republic of Uzbekistan, as well as in training courses, training seminars organized by international organizations. Employees of the department give lectures at training courses organized by the Institute for Professional Skills Upgrading and Statistical Research. The placement of scientific articles of the department’s employees in the mass media has been organized.

1.1.2 Selection of sources, methodology, and modes of dissemination

The Statistics Agency under the President of the Republic of Uzbekistan

According to Article 33 of the Law “On Official Statistics”:

Producers of official statistics assess the quality of official statistics on an ongoing basis. To ensure quality assurance, official statistics are produced and disseminated on the basis of general principles and methods concerning coverage, definitions, statistical units and classifications of official statistics.

In order to improve the quality of official statistics, producers of official statistics have the right to analyze and edit data, combine data from various sources, link and compare data for statistical purposes, and use statistical methods to evaluate them.

Producers of Official Statistics document the sources and methods used in the production process as well as the resulting datasets. Users of official statistics are informed about the sources and methods of producing statistics and about the quality of official statistics through metadata.

1.1.3 Commenting on erroneous interpretation and misuse of statistics

The Statistics Agency under the President of the Republic of Uzbekistan

The Statistics Agency may comment on misinterpretation and misuse of statistical data.

1.2 Transparency

1.2.1 Disclosure of terms and conditions for statistical collection, processing, and dissemination

The Statistics Agency under the President of the Republic of Uzbekistan

According to Article 6 of the Law “On Official Statistics”, the main principles of official statistics are clarity and transparency. The conditions for the collection, processing and dissemination of statistical data are included in the legislative acts of the Republic of Uzbekistan concerning statistics. These laws are posted on websites and are thus available to the public. The Law “On Official Statistics” and the statistical program, which clearly defines the terms for the development and dissemination of statistical data, are posted on the official website of the Statistics Agency (<https://stat.uz>). The law is available in the bulletin of the Oliy Majlis, the database of regulatory legal acts (norm), as well as in the database of the Ministry of Justice located at www.lex.uz . Statistical reporting forms submitted by respondents to generate statistical data are published in advance for users on the Statistics Agency 's official website.

1.2.2 Internal governmental access to statistics prior to release

The Statistics Agency under the President of the Republic of Uzbekistan

The government does not have access to the statistics produced by the Statistics Agency prior to their publication. State statistical bodies are independent in the dissemination of statistical data. Interference by state bodies is not allowed (Article 13 of the Law “On Official Statistics”). Only the Director of the Agency, his deputies and responsible employees have access to statistical data prior to their publication.

1.2.3 Attribution of statistical products

The Statistics Agency under the President of the Republic of Uzbekistan

The logo and footnotes clearly identify that the information published for the public in print statistical publications, information bulletins and in mass media is produced by the Statistics Agency.

1.2.4 Advance notice of major changes in methodology, source data, and statistical techniques

The Statistics Agency under the President of the Republic of Uzbekistan

The Statistics Agency notifies the public in advance about the transition to a new methodology and significant changes in existing methods and approaches. The Statistics Agency posts on its official website the relevant methodological guidelines explaining what changes users should expect. The expected changes are communicated to the public in articles, news and press conferences.

1.3. Ethical standards

1.3.1 Guideline for staff behavior

The Statistics Agency under the President of the Republic of Uzbekistan

The Rules of Conduct for the Statistics Agency's employees were approved. They are required to comply with a code of ethics, including the principle of confidentiality, and must not disclose any information provided to them in the performance of their assigned duties. They are informed of these obligations upon appointment. An employee of the Statistics Agency is obliged to conclude an agreement containing an obligation not to disclose individual data.

2. Methodology

2.1 Concepts and definitions

2.1.1 Concepts and definitions

The concepts and definitions used are based on internationally recognized statistical systems.

The following International recommendations apply for calculations:

"Principles and Recommendations for a Vital Statistics System" approved by the UN Statistical Commission at its 45th session in 2014 (Third revised edition, UN New York, 2015).

"Recommendations on Statistics of International Migration" (First revised edition, UN New York, 1998).

International statistical classification of diseases and related health problems, approved by the International Conference on the Tenth Revision of the ICD in 1989 and adopted by the Forty-third World Health Assembly.

"Recommendations of the Conference of European Statisticians for the 2020 Population and Housing Censuses" United Nations, New York and Geneva, 2015.

Population and Housing Census in Eastern Europe, the Caucasus and Central Asia (Review of Census Practices 2010 Round, UN New York, 2016).

Guide to the use of administrative sources and sample surveys to measure international migration in the CIS countries, UNECE, 2016.

National regulations and legal acts:

Law of the Republic of Uzbekistan "On the administrative-territorial structure of the Republic of Uzbekistan" dated August 28, 2020 No. LRU-635;

Family Code of the Republic of Uzbekistan, approved by the Law of the Republic of Uzbekistan dated April 30, 1998 No. 607-I;

Civil Code of the Republic of Uzbekistan, approved by the laws of the Republic of Uzbekistan dated December 21, 1995 No. 163-I and dated August 29, 1996 No. 256-I;

Order of the Minister of Justice of the Republic of Uzbekistan "On approval of civil registration forms and rules for filling them out" dated October 23, 2012, No. 234-mx;

Order of the Minister of Health of the Republic of Uzbekistan "On approval of the Instructions on the procedure for issuing a medical certificate of birth, medical certificate of perinatal death and death in healthcare institutions of the Republic of Uzbekistan" dated February 27, 2010 No. 56;

Decree of the President of the Republic of Uzbekistan “On additional measures to improve the passport system in the Republic of Uzbekistan” dated January 5, 2011 No. DP-4262;

Order of the Ministry of Internal Affairs of the Republic of Uzbekistan “On approval of the Instruction “On the procedure for implementing the passport system in the Republic of Uzbekistan” dated April 9, 1999 No. 55;

Methodological provisions for the formation of basic demographic indicators, approved by the Order of the Statistics Agency of May 31, 2024 No. 123;

Guidelines for coding information on civil status acts and statistical registration coupons in the formation of basic demographic indicators, approved by the Order of the Statistics Agency of April 31, 2024 No. 78.

2.2 Scope

2.2.1 Scope

2.2.1.1 Scope of the data

The geographical coverage of the data includes the Republic of Karakalpakstan, 12 regions and the city of Tashkent.

Population density data covers the territory and permanent population of the Republic of Uzbekistan. Population density is determined by the ratio of the total permanent population in a certain territory to the area of this territory.

For example:

As of January 1, 2021 the permanent population was 34,558.9 thousand people;

Area as of January 1, 2021 – 448.97 thousand sq. km;

Population density as of January 1, 2021 – 77.0 people per 1 sq. km.

$(34,558.9/448.97)$.

2.2.1.2 Exceptions to coverage

There are no exceptions to statistical coverage.

2.2.1.3 Unrecorded activity

There are no unaccounted activities.

2.3 Classification/sectorization

2.3.1 Classification/sectorization

To compile data on the territory, the statistical classifier “System of designation of administrative-territorial entities of the Republic of Uzbekistan” is used.

2.4 Basis for recording

2.4.1 Valuation

The basic unit of accounting is a person per 1 sq. km.

2.4.2 Recording basis

Population density is determined by the ratio of the total permanent population in a certain territory to the area of this territory.

2.4.3 Grossing/netting procedures

Population density is calculated based on current records of the resident population and changes in the area of territories.

3. Accuracy and reliability

3.1 Source data

3.1.1 Source data collection programs

The evaluation of the initial data is carried out systematically. The results of the assessments are monitored and taken into account in the statistical process.

The precision and accuracy parameter applies to annual and quarterly population estimates.

3.1.2 Source data definitions, scope, sectorization, classifications, valuation, and time of recording

The source data comes reasonably close to the required parameters in terms of definition, statistical coverage, classification, evaluation and timing.

Population density is calculated in accordance with the Law on the Administrative-Territorial Structure of the Republic of Uzbekistan and the Methodological Provisions on the Formation of Basic Demographic Indicators.

3.1.3 Source data timeliness

The data collection program ensures that data is received in a timely manner.

The source data are developed by the Statistics Agency under the President of the Republic of Uzbekistan for the republic and by territories according to the results of each year within the time limits set by the Statistical Program.

3.2 Assessment of source data

3.2.1 Source data assessment

The received data is analyzed, undergoes mandatory control and verification at the regional statistics departments and the Statistics Agency. If registration errors are detected, the information must be clarified.

3.3 Statistical techniques

3.3.1 Source data statistical techniques

Population density data covers the permanent population and the territory of the Republic of Uzbekistan.

The statistical methods used are consistent with sound statistical procedures, which helps to minimize processing errors.

Data compilation procedures help to minimize errors in data processing, such as errors in coding, data editing and tabulation.

3.3.2 Other statistical procedures

Correction and transformation of data is carried out on the basis of methodological provisions for the formation of basic demographic indicators, guidelines for coding information on civil status acts and statistical registration coupons when forming basic demographic indicators of the Statistics Agency.

3.4 Data validation

3.4.1 Validation of intermediate results

Regular reconciliation of estimated and reporting data is carried out. The difference between operational and updated data is insignificant.

3.4.2 Assessment of intermediate data

Interim and output statistics are regularly assessed and verified.

Based on the results of the annual development, data on the size of the permanent population and population density are updated.

3.4.3 Assessment of discrepancies and other problems in statistical outputs

Statistical discrepancies in interim data are assessed and examined. Statistical discrepancies and other potential indicators of problems in the output statistics are examined.

If discrepancies are identified in previously published data, changes are made to these data in subsequent publications.

3.5 Revision studies

3.5.1 Revision studies and analyses

The study and analysis of revisions is carried out systematically and their results are taken into account in internal statistical work.

Based on the results of the annual development, the population at the beginning of the year and the average annual population for the year, population density are specified.

4. Serviceability

4.1 Periodicity and timeliness

4.1.1 Periodicity

Frequency and timeliness meet internationally accepted standards for data dissemination.
Population density data is collected annually.
Publication of population density statistics occurs annually, which meets the requirements of the IMF GDDS.

4.1.2 Timeliness

Annual data on population density for the republic as a whole and by region, district and city for the reporting year are available in May of the following year.
Demographic statistics for the entire republic and regions for the reporting year are available in August of the following year.

4.2 Consistency

4.2.1 Internal consistency

Statistical data are characterized by internal consistency and are comparable over time.

4.2.2 Temporal consistency

Comparable time series data are available for a sufficient period of time. Time series start from 1991 and are posted on the website of the Statistics Agency.

4.2.3 Intersectoral and cross-domain consistency

The statistical data is consistent with data obtained from other sources (registry offices under the Ministry of Justice and others).

4.3 Revision

4.3.1 Revision and/or update schedule

The data review cycle will be determined in advance. The deadlines for preparing preliminary and final data are determined by the annually developed statistical program.

4.3.2 Identification of preliminary and/or revised/updated data

During data dissemination, users are informed whether the data is preliminary.
When preliminary data are published, a corresponding entry is made.

4.3.3 Dissemination of revision studies and analyses

The revised data is analyzed in comparison with the preliminary data, which makes it possible to assess the reliability of the preliminary data.

5. Accessibility

5.1 Data

5.1.1 Statistical presentation

Data are published by territory.

Quarterly and annual data are provided by the user through the publications “Socio-economic situation of the Republic of Uzbekistan”, “Demographic Yearbook of Uzbekistan”, “Statistical Yearbook of Uzbekistan”, “Uzbekistan in Figures”, “Women and Men of the Republic of Uzbekistan” and others, as well as on the official website - website of the Statistics Agency at www.stat.uz, www.siat.stat.uz, www.gender.stat.uz.

5.1.2 Dissemination media and format

5.1.2.1 Hard copy - New release

The data is distributed to users in printed form through the publications of the Statistics Agency:

- “Statistical Yearbook of Uzbekistan”
- “Demographic Yearbook of Uzbekistan”
- “Women and men of the Republic of Uzbekistan”
- “Uzbekistan in Figures”
- “Statistical yearbook of regions of Uzbekistan”
- “Social development and standard of living in Uzbekistan” and others.

In addition, data is presented according to agreed table layouts to government authorities and other users upon their request.

5.1.2.2 Hard copy - Monthly bulletin

Not available.

5.1.2.3 Hard copy - Quarterly bulletin

The publications “Socio-economic situation of the Republic of Uzbekistan”, “Statistical Review of the Republic of Uzbekistan”, “Natural movement of the population of the Republic of Uzbekistan” are distributed quarterly.

5.1.2.4 Hard copy - Annually bulletin

Not available.

5.1.2.5 Hard copy - Other

Tables are available upon user request.

5.1.2.6 Electronic - On-line bulletin or data

On the official website of the Statistics Agency statistical data, time series in the form of electronic tables are posted quarterly and constantly updated, as well as press releases and the “Statistical Review of the Republic of Uzbekistan” are published at www.stat.uz.

5.1.3 Advance release calendar

The calendar of official statistics is published on the official website www.stat.uz.

5.1.4 Simultaneous release

No.

5.1.5 Dissemination on request

According to the Law of the Republic of Uzbekistan “On Official Statistics” and other regulatory documents, statistical data is provided by the user upon their request in the prescribed manner. Dissemination of statistical information is carried out by providing upon written request of legal entities, individuals and international organizations in the form of printed or electronic tables, statistical collections, express information, as well as provision in accordance with agreements of the parties on information interaction.

5.2 Metadata

5.2.1 Dissemination of documentation on concepts, scope, classifications, basis of recording, data sources, and statistical techniques

Data on concepts, accounting frameworks, data sources and statistical methods are reflected in disseminated statistical collections in the form of methodological explanations of the main indicators.

The official website of the Statistics Agency contains methodological provisions for the formation and calculation of statistical indicators.

5.3 Assistance to users

5.3.1 Dissemination of information on contact points

Official publications of the Statistics Agency provide addresses (mail, telephone, fax, e-mail, etc.) for contacting personnel responsible for the preparation of statistics.

9. Plans

9.1 Recent

9.1.1 Plans for improvement - Recent improvements

The software for recording the natural and mechanical movement of the population has been improved.

Improved registration of demographic events.

9.2 General

9.2.1 Plans for improvement - Short-term

No.

9.2.2 Plans for improvement - Medium-term

Improving data exchange between the Statistics Agency, the Ministry of Justice, the Ministry of Health and the Ministry of Internal Affairs.

9.3 Financial

9.3.1 Plans for improvement - TA/financing needs - Short-term

No.

9.3.2 Plans for improvement - TA/financing needs - Medium-term

To implement medium-term plans, technical assistance is needed in studying international recommendations and best practices.
